

This PDF intentionally represents the 72dpi version of the site. It was designed to be viewed on a 1dpr Windows screen for typography (font hinting) reasons.

To view it at a higher resolution, visit <saba.pyt.ge/page/ui/ux> for a live and screen-width responsive version.

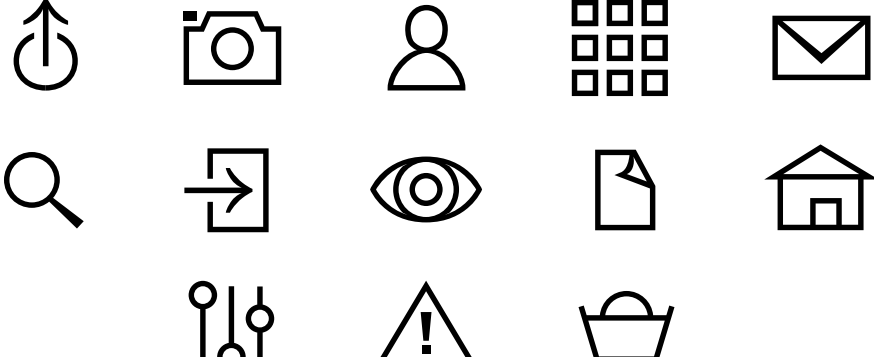

If possible, please view at a zoom level so that each pixel in the images below are represented clearly and are not blurry.

The color fringing that may be visible on text below is due to Microsoft Cleartype, and is an important part of the intended look of the typography on 1dpr screens.
