# An Easier Way to Share

mznet provides a sleek and simple way to share files.

use our ftp front-end to share files on your network securely, by cutting out the hosting middleman.

Create a customized file depot for your organization or project, and export simple-to-use webpages for clients or other outside users.

Customizeable and clear UI

Set things up the way you like, and see it all a glance every time you log in.

Discovery Method
A wonderful serenity has taken possession of my entire soul, like these sweet mornings of spring which I enjoy with my whole heart. I am alone, and feel the charm of existence in this spot, which was created for the bliss of souls like mine.
